### Your Trusted Partner for MDS Compliance, Data Integrity & Reimbursement Accuracy

When selecting a provider for remote MDS and RNAC services, it's essential to choose a partner with the experience, qualifications, and proven results to support your facility's success. Affinity Health Services brings the expertise and operational strength to help you maximize compliance, improve efficiency, optimize payments, and maintain resident-centered care throughout the assessment process.

Our team begins with a comprehensive assessment to identify your facility's unique needs and assigns a remote RNAC / MDS Coordinator with the right blend of experience, clinical knowledge, and regulatory expertise. Through consistent communication, ongoing monitoring, and performance review, we help ensure care standards remain high, documentation remains accurate, and survey risk is reduced.

Affinity's MDS and RNAC professionals take full responsibility for the assessment cycle, including:

- Scheduling and assessment tracking
- Data validation and clinical documentation review
- Accurate MDS coding and RAI compliance support
- Care Area Assessments (CAAs)
- Care plan integration and interdisciplinary coordination
- Timely electronic submission and audit readiness

## The Affinity Advantage

- ▲ **Regulatory Compliance** - We ensure all MDS assessments are completed within required timeframes and submitted accurately and on schedule.
- ▲ **Accuracy & Integrity** - We validate that clinical documentation supports MDS coding, promoting accurate case mix classification and dependable reimbursement outcomes.
- ▲ **Resident-Centered Care Planning** - We support the development and ongoing refinement of individualized care plans guided by CAAs and MDS-driven clinical insights.
- ▲ **Operational Efficiency** - We reduce administrative burden on facility teams, allowing clinical staff to stay focused on direct resident care and outcomes.
- ▲ **Performance Monitoring** - We provide compliance, accuracy, and quality measure reports to help leadership monitor performance, identify opportunities, and drive improvement.

## What Our Clients are Saying

*"The level of professional knowledge of the Affinity RNAC temporary staffing team is unmatched. Kay provided critical support to our facility when we needed it most. The Affinity team demonstrated clear, effective communication to the team members. This enabled completion of time sensitive documentation to support each resident's care and also provided balance by ensuring that relevant clinical information was captured to facilitate the appropriate level of reimbursement for the care provided. Affinity's mission and commitment to balance resident care with financial stability was evident in the services they provided. I would offer my highest recommendation of the Affinity temporary RNAC support team."*
